

Ceres – The perfect place to grow juice

Tucked away in a crescent of mountains at the Southern tip of Africa, lies a beautiful fertile valley called Ceres. Ceres is a town with 46,251 inhabitants in the Western Cape Province of South Africa. It is a mere 150 km or 90 minutes drive from the Cape Town city and port. The harbour, in close proximity, facilitates exports of our well-known Ceres Juice to various parts of the world.

The perfect fruit growing conditions of Ceres is due to great temperature variances between the summer maximums and the winter minimums. January and February are regarded as the hottest months of the year with an average maximum of 30°C whilst the average minimum of 2,4°C is measured during July. The ample winter rains make it a wonderful fruit growing area and snow during winter, keeps temperatures low, while fruit trees are in their rest period.

Blessed with abundant sunshine and fertile soil, it is home to some of the world's most succulent fruit. Sun-ripened to perfection, the fruit from the Ceres valley is full of essential nutrients, vitamins and minerals. As pure as nature intended, Ceres 100% fruit juice contains no added sugar or preservatives, which makes it the perfect drink for the whole family. Ceres – The perfect place to grow juice.
